123-456-7890 | saisrisuhas.chappidi@gmail.com | [linkedin.com/in/sai-chappidi12](https://www.linkedin.com/in/sai-chappidi12)

EDUCATION

The Ohio State University
Computer Science & Engineering Major

Expected Graduation: May 2027
Columbus, OH

Experience

Software Engineering Intern

May 2025 – August 2025

WineDirect Fulfillment

- Developed a comprehensive documentation website, overseeing future updates.
- Optimized 1,000+ shipping orders with Salesforce flows and Apex, improving efficiency.
- Resolved many shipping issues using Apex, improving distribution accuracy.
- Implemented a lightning web component to identify incorrect backlogs in Salesforce.
- Made and wrote documentation for the Salesforce flows.

Co-founder, Board Member

Dec 2021 – Present

J-To-A

Dublin, OH

- Led outreach, emailing over 30 schools and news sources for advertisements, securing 50 volunteers and 70+ students.
- Assisted in gaining over \$130,000 in donations and grants used to promote the organization.

Sensei

Jul 2023 – April 2026

Code Ninjas

Dublin, OH

- Guided 50+ children in coding via game development using C# in Unity, JavaScript, and Roblox Lua.

TECHNICAL SKILL

Java, Python, Salesforce, Apex, SQL, SOQL, HTML, CSS, JUnit, Git, C, x86-64 Assembly, C#, ASP.NET, MATLAB, JavaScript, Ruby, Rails, Lua, Node.js, Jira, Confluence, Agile, CI/CD, Microsoft Office, Tailwind, Bootstrap, Docker, AutoCAD, CAD, MySQL, MVC, Microsoft Azure, C++, React, Rest, PostgreSQL, T-SQL, Postman, OpenAI, Gemini

Soft Skills: Leadership, Communication, Collaboration, Perseverance, Problem Solving

Current Coursework: Systems II, Software Requirements Analysis, Survey of Artificial Intelligence I, Introduction to Digital Logic, Design, Development, Documentation of Web Applications

Certification: Salesforce Certified Agentforce Specialist

PROJECTS

BlinkVM: microVM Monitor | C, Linux KVM, QEMU

APR 2026

- Engineered a lightweight virtualization monitor in C using the Linux KVM API to manage hardware-accelerated guest VMs.
- Implemented vCPU execution loops, guest memory mapping, and KVM exit handling for I/O, serial console passthrough.
- Abstracted hypervisor logic into a unified CLI, supporting macOS/QEMU fallbacks for cross-platform development workflows.

SplitTheBill | HTML, CSS, Ruby on Rails, JavaScript, Docker

APR 2026

- Developed a Rails web app for creating trips, logging categorized expenses, and splitting costs among participants
- Architected a relational domain model with `has_secure_password` authentication and scoped trip access for participants

RescueAI | Python, JSON, YOLO

Feb 2025

- Created a Q learning algorithm for a drone system to traverse through a grid efficiently, through over 1000 episodes
